EXPERIENCE

Lumos Labs | Wizard

June 2023 –Present

- Spearheaded the development of Lumos Labs' Wizard portal, leveraging React, Node.js, and MongoDB to enhance both frontend and backend functionalities, resulting in a 33% increase in user engagement.
- Orchestrated a series of meetups and events for Web3 and Blockchain aimed at expanding awareness and engagement within the Lumos ecosystem, resulting in a 20 to 25% growth in community participation.

Connect-Link | Fullstack Development Intern

Oct 2023- Jan2024

- Collaborated with senior developers to build a sophisticated social media app, driving a 52% increase in development progress through seamless frontend and backend development.
- Utilized cutting-edge technologies like socket.io, Next.js, React, MongoDB, and Node.js to create a high-caliber, production-grade project, ensuring optimal user experience and functionality.

Salesforce | Developer virtual intern

Oct 2022- Dec 2022

- Executed diverse tasks utilizing Salesforce's platform, including Lightning App Services and Apex, gaining practical insights into platform functionalities.
- Explored various services and features of the Salesforce platform, enhancing proficiency through hands-on experience.

PROJECTS

Idlidu – Find Artist easily | Next.js, React, Typescript, Prisma, MongoDB, cloudinary [DEMO](#) [GITHUB](#)

- Successfully completed freelance project for a startup, crafting a user-friendly platform facilitating **easy connections between event organizers and artists**, enhancing the talent-finding process.
- Implemented **server-side rendering**, Overcame challenges in **user authentication, talent categorization, and image management** to ensure seamless platform functionality.

FastPloy - React app deployment service | AWS-S3 . React , Typescript ,Redis-queue

[GITHUB](#)

- A backend-heavy project facilitating **streamlined deployment services** for basic React projects. Components include **Upload Server for GitHub repository cloning and AWS S3 uploading, Deploy Server for building projects and Redis queue management, and Request Handler for serving project files.**
- Simplifies React project deployment by automating processes like source code cloning, AWS S3 uploading, and file serving, enhancing efficiency and scalability for developers.

EDUCATION

- **Bachelor of Engineering in Computer Engineering -Sandip Institute of Technology and Research Center**

- **CGPA: 9.43 / 10.0 (6th Sem)**

Jun2021 - Jul 2025

TECHNICAL SKILLS

- **Web Development:** Next.js, React.js, Tailwind CSS, HTML, CSS, Node.js Redux-toolkit, Express, Sanity CMS
- **Databases and Cloud :** MongoDB, Postgres Prisma, Google Cloud Platform, AWS , Microsoft Azure (Basics)
- **Version Control:** GitHub, Git
- **Languages:** C++, Python, JavaScript, Typescript

CERTIFICATIONS

- Google Cloud Career Practitioner - Google Cloud
- AWS Cloud Practitioner Essentials - Amazon Web Services
- Fullstack Web development - London App brewery , Udemy

INVOLVEMENT AND HONORS

- Chairperson, IEEE-SITRC (2024-2025) | AI/ML Volunteer, GDSC SITRC
- 2nd Prize Winner, Nash-Lon Hackover by Hackerrank | 1st Prize Winner, Smart India Hackathon internals
