EDUCATION

BE Computer Science, Vidyalankar Institute of technology, CGPA: 9.78   2020 - 2024
HSC, IES Junior College, Result: 84%   2018 - 2020

SKILLS

Languages :	HTML, CSS, JavaScript, Java, C
Framework and Libraries :	React.js, Node.js, Express.js, Tailwind CSS, SASS
Database :	MongoDB, PostgreSQL
Tools :	VSCode, Figma, Git, Postman

EXPERIENCE

Software Development Engineering Intern   August 2023 - October 2023
Byteridge   *Remote, Hyderabad*

- **Developed API methods** with a focus on data operations, utilizing **Prisma Client with PostgreSQL** for the backend of an inclusive job portal using **Node.js.** Additionally, created user-friendly **API documentation using Swagger.**
- Actively participated in **Unit testing** using **Chai and Mocha**, achieving a **code coverage of 90%** to ensure code reliability.
- Implemented **SonarQube** for ongoing code quality analysis, maintaining high coding standards throughout the project.

PROJECTS

ComfySloth
React.js, Styled Components

- Developed an e-commerce website with authentication powered by **Auth0**, payment processing via the **Stripe API**, and content management utilizing **Airtable**.
- Implemented a responsive and modular UI design using Styled Components.

TravelAdvisor
React.js, Bootstrap, MaterialUI

- Suggestions of restaurant, hotels, tourist attraction are made base on current location of device.You can search for specific location and apply filters as well.
- Integrated various third party API's from **GoogleMaps** and **RapidAPI**.

Bloodbank Management System
React.js, Node.js, PostgreSQL, AWS

- This website connects blood storage facilities to manage blood supply and demand. It also allows citizens to find and register for donation camps in their area.
- Used AWS services like RDS (**data storage**), SNS (**SMS notification**), Amplify (**Hosting**), **API Gateway** to deploy my own REST API and wrote Lambda Functions in node.js to create a **serverless** project.

ACHIEVEMENTS

- Won HackTheRunway hackathon by MLH for the best use of web monetization.
- Completed the Software Engineering Virtual Experience at JPMorgan & ChaseCo.
- Open Source contributions in Hacktoberfest and GirlScript Summer of Code.
